

Our site holds AA Grade certification against the British Retail Consortium Global Standard for Food Safety

OUR FOOD SAFETY GUARANTEE!

- All of our ingredients are sourced and purchased from approved, reputable UK based suppliers.
- Our manufacturing unit has been purpose built to meet all requirements for good manufacturing practice.
- We use accredited 3rd party temperature controlled transport to ensure our products are delivered to you in perfect condition.
- All of our staff are fully trained in food safety and hygiene.
- Full microbiological testing on products is carried out by an independent UKAS accredited laboratory.

DOING OUR BEST FOR THE ENVIRONMENT!

♥n the Farm

- We have a 1.6 million litre dirty water tank that stores waste water for 6 months and then it is suitable to be used on the grass land as an organic fertiliser.

At the Yorvale Dairy

- We are saving on water! Instead of water used to cool the compressors running to waste, an enclosed adiabatic system is used to cool and recycle water. This means no waste water!
- We are saving on energy! The compressors on the cold rooms have a heat recovery system that pre heats water that can be stored and used in cleaning.
- We are producing our own energy! 100 kilo watt solar panels power the factory
- We are recycling! All of our packaging is 100% recyclable and we recycle our waste cardboard and plastic

Community

We pride ourselves on our sense of community and have and continue to support many charities and local initiatives.
